DISPATCH

Programmatic distribution that finds the right candidates for the role.

Every Dispatch tier automatically distributes your job across our full publisher network and manages placement for you. What changes between tiers is how much budget and priority your job gets, matched to how urgent or hard-to-fill the role is.

THE TIERS

Core

Full publisher network at base-level spend. The right starting point for employers new to programmatic, or for lower-volume hiring.

Boost

Increased spend allocation across the same network, for greater visibility and more applications than Core.

Velocity

Higher spend thresholds and priority placement. Built for roles where speed and volume matter.

Apex

Our highest fixed-cost tier, with the highest bid ceilings and maximum exposure for high-urgency or hardest-to-fill roles.

- ✓ Automated distribution across the full publisher network
- ✓ Automated budget pacing
- ✓ Active campaign monitoring and optimization
- ✓ Performance reporting on every job
