NETWORK ORBIT

Reach candidates by affinity, not just industry.

Network Orbit distributes your job into publisher networks built around a candidate community, not a job function. Useful for broadening who sees your opening and for supporting modest outreach and compliance goals.

WHY AFFINITY REACH WORKS

Reach beyond your usual pool

Community-specific channels put your opening in front of candidates who might scroll past a generic listing entirely.

Built into hiring, not bolted on

Broadens representation and access as part of the same order, not a separate initiative that needs its own budget line.

Meet candidates early

College reach puts your opening in front of students and new grads before they've started job-searching in earnest.

Speaks to the transition

Veterans reach is written for the shift from military service to civilian careers, not a repurposed general post.

THE SEGMENTS

ENTRY-LEVEL & INTERNSHIPS

College

Reach students and recent graduates starting their careers, a strong fit for entry-level and internship roles.

BROADEN YOUR POOL

Diversity

Widen the range of candidates who see your opening and support a more representative applicant pool.

TRANSITIONING TALENT

Veterans

Reach candidates transitioning from military service into the civilian workforce.

- ✓ Broadens your candidate pool beyond active job seekers
- ✓ Supports representation and outreach goals
- ✓ Pairs naturally with Dispatch and Signal
- ✓ See Packages for a pre-built combination
